

WT-5 AMP FORCE CALCIUM CONTROL UNIT

THE ONE WATER SYSTEMS WT-5 AMP FORCE CALCIUM CONTROL UNIT SOLVES THE PROBLEMS ASSOCIATED WITH "HARD WATER" ELECTRONICALLY, INSTEAD OF THE CHEMICAL PROCESSES USED BY WATER SOFTENERS AND WITHOUT THE NEED FOR ADDING SALT (SODIUM OR POTASSIUM CHLORIDE). BY USING ELECTRONIC IMPULSES THE WT-5 DE-CRYSTALLIZES THE HARD WATER MINERALS, CALCIUM BICARBONATE AND MAGNESIUM BICARBONATE. NOT ONLY DOES THIS PREVENT MINERAL BUILD UP, BUT IT WILL ACTUALLY REDUCE ANY EXISTING BUILD UP.

PROTECTED BY U.S. PATENT NO: 8,157,971,-B2
I.A.P.M.O. TESTED AND CERTIFIED.
PC BOARD IS U.L. CERTIFIED.
ELECTRONICS ARE TUV CERTIFIED.
PLASTICS CONTAINING WATER ARE NSF/PW CERTIFIED.

NO MAGNETS. NO SALT. NO MAINTENANCE
